Learning Styles

Results:

- Auditory: 40%
- Visual: 40%
- Tactile: 20%

You are an **Auditory/Visual** learner!

This result was something I didn't really expect, but it makes sense for my major. I think I have always kinda struggled not to see a visual example of some kind when it came to a problem. To optimize my learning I will probably have to do some research to find a video or something to explain concepts that I don't get.
